Foreword

Deepshikha Books & Info Services has taken an innovative step towards changing the way we look at teaching numbers by combining it with **Intelligence Enhancement** Activities and Observation Skills Enhancement Activities. Special focus has been put on developing the child's Spatial Aptitude.

The activities are so dynamic and engaging that children aren't bored even for a second !

With the bright, beautiful, **colourful and** vivid pictures of this book the child feels fresh even inside the walls of the classroom.

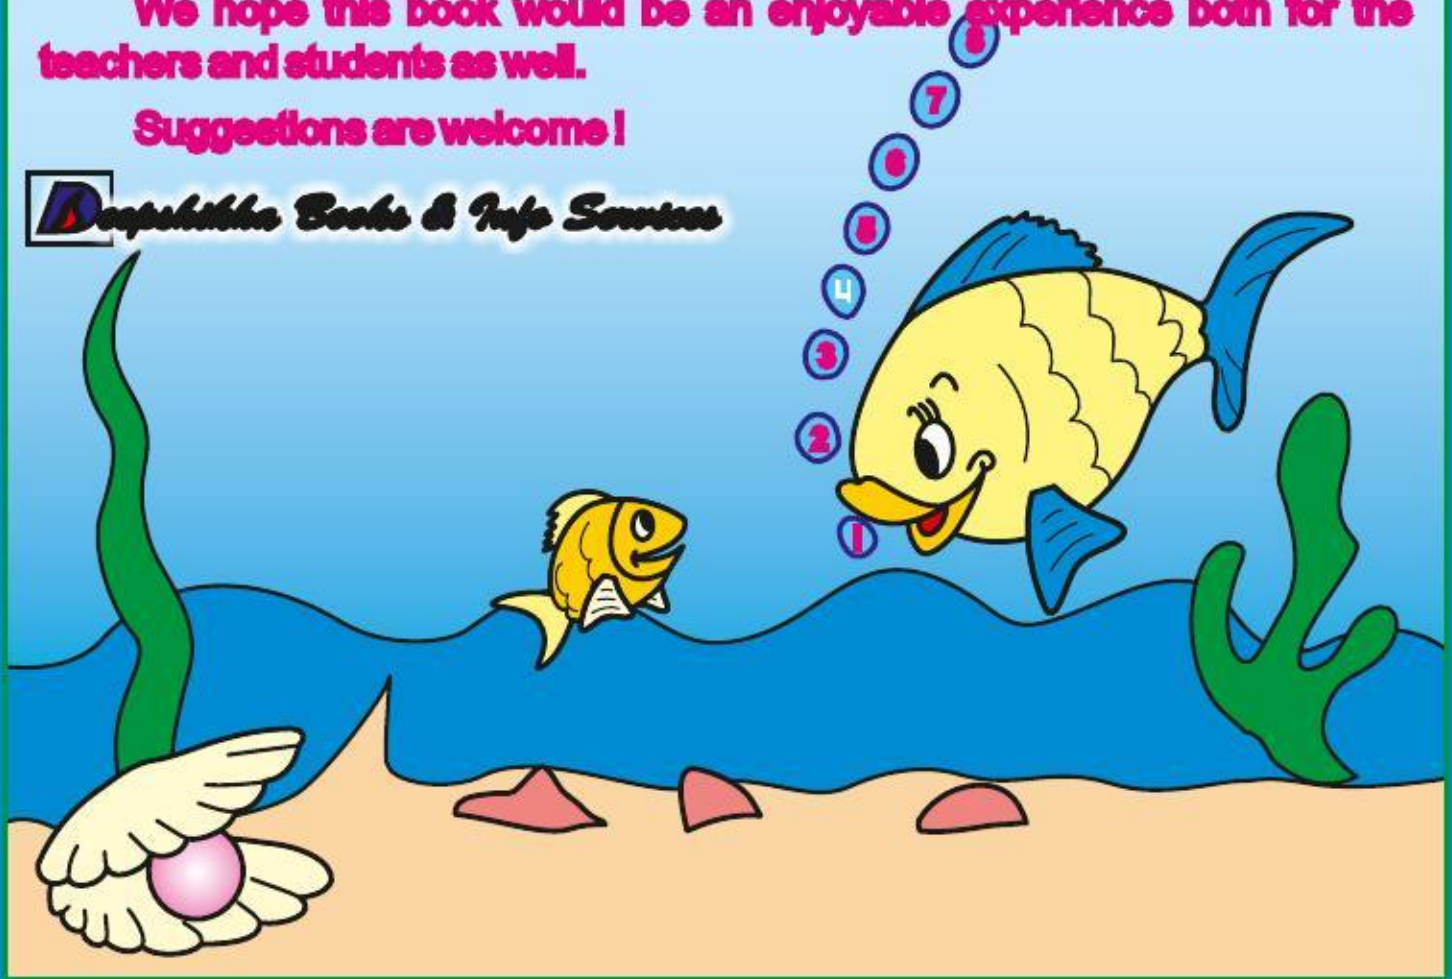

After completing this book the child will be able to co-relate numbers, shapes and patterns in day-to-day life within his surroundings.

We hope to make teaching easy for the teachers as much as it is enjoyable for the students.

We hope this book would be an enjoyable experience both for the teachers and students as well.

Suggestions are welcome !
